

**PulseAccess (PULSE)**  
Version 1.0  
Polygon Network  
The Performance-Driven Ecosystem

## 1. Token Identity

**Token Name:** Pulse

**Symbol:** PULSE

**Blockchain:** Polygon (PoS)

**Standard:** ERC-20

**Decimals:** 18

**Total Supply:** 1,000,000,000 PULSE

**Circulating Supply:** Dynamic (Based on LP & Holdings)

**Smart Contract:** Verified

**Liquidity:** Public

**LP Tokens:** Locked via third-party locker (UNCX)

---

## 2. Contract Mechanics

Buy Tax: 0%

Sell Tax: 0%

Whitelist Restrictions: None

Blacklist Restrictions: None

Trading Cooldown: None

Mint Function: None (Fixed Supply)

Burn Function: Owner-controlled (currently enabled)

Pulse is designed with simplicity and transparency in mind.

No hidden transfer fees.

No anti-user mechanisms.

---

### **3. Liquidity Structure**

Primary DEX: QuickSwap (Polygon)

Liquidity Pair: PULSE / WPOL

Liquidity is:

- Publicly accessible
- Tradeable by anyone
- Locked for defined duration
- Verifiable on-chain

LP lock proof available publicly via third-party locker.

---

### **4. Supply Structure Overview**

Total Supply: 1,000,000,000 PULSE

Allocation Structure (Current Framework):

- Public Liquidity Allocation
- Ecosystem Development Reserve
- Treasury Reserve
- Strategic Growth Allocation

Exact allocation ratios may evolve with governance in future phases.

---

### **5. Treasury Overview**

Pulse ecosystem includes a treasury model intended to support:

- Development infrastructure
- Liquidity reinforcement
- Strategic buybacks
- Ecosystem expansion

Treasury operations will gradually move toward governance participation.

---

## 6. Founder & Project Transparency

**Founder:** Naveen B

**Role:** Ecosystem Architect & Strategic Lead

The founder oversees:

- Treasury design
- Liquidity structuring
- Ecosystem development roadmap
- Strategic performance integration

Founder Wallet Transparency:

- Major allocations are publicly visible on-chain.
- Liquidity locks are verifiable.
- No hidden minting authority.

The project aims to gradually introduce broader governance participation as infrastructure matures.

Transparency, capital discipline, and structural growth are core principles of Pulse.

---

## 7. Risk Disclosure

Pulse is an early-stage ecosystem token.

Digital asset markets involve:

- Volatility risk
- Liquidity fluctuations
- Market sentiment cycles

Pulse does not guarantee returns.

Participants should conduct independent research.

---

## **8. Closing Statement**

Pulse is a structurally designed ecosystem token built for progressive reinforcement — not short-term speculation.

The infrastructure is live.

The foundation is public.

The evolution will be deliberate.
